## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE one MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 24 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION*****Election/Restrictions***

This application contains claims directed to the following patentably distinct species: hydroxypropyl methyl cellulose, cationic hydroxyethyl cellulose, ethyl cellulose, hydroxypropyl cellulose, hydroxymethyl cellulose, carboxymethyl cellulose, polymethylene oxide, and chitosan pyrrolidone carboxylate. This application contains claims directed to the following patentably distinct species: PEG 20 Almond Glycerides, Probutyl DB-10, Glucam P20, Glucam E-10, Glucam P-110, Glucam E-20, Glucam P-20 distearate, glycerine, propylene glycol, oxtoxy glycerin, cetyl acetate and acetylated lanolin alcohol, cetyl ether, myristyl ether, hydroxylated milk glycerides, polyquaternium compounds, chitosan, copolymer of dimethyl dialyl ammonium chloride and acrylic acid, dipropylene glycol methyl ethers, and polypropylene glycol ethers. This application contains claims directed to the following patentably distinct species: incorquat behenyl TMS-50, Polawax, stearyl alcohol and cetearyl alcohol. This application contains claims directed to the following patentably distinct species: polydimethylsiloxane polymer, dimethiconol fluid in dimethicone, cyclomethicone and dimethicone copoly, and silicone glycol. This application contains claims directed to the following patentably distinct species: mono-glyceryl ethers, diglyceryl ethers, ethoxylate ethers, propoxylate ethers, ethoxy diglycol esters, ethyl hexyl alcohol, propoxylate, and propylene glycol. This application contains claims directed to the following patentably distinct species: crothix, crodamol, and behenyl alcohol. This application contains claims directed to the following

Art Unit: 1616

patentably distinct species: chlorhexidine gluconate, triclosan, benzalkonium chloride, providone iodine, and phenoxyethanol. This application contains claims directed to the following patentably distinct species: ethanol, isopropyl alcohol, n-propyl alcohol, cetyl alcohol, myristyl alcohol, stearyl alcohol, octyl alcohol, decyl alcohol, lauryl alcohol, and hexanol. The species are independent or distinct because the compounds have different structural characteristics and therefore have different classifications.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-6, and 33-34 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

A telephone call was made to Sandra Lee on 09/24/2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
